Guided Practice Challenge

Task 1 — Inspect

1. Load the dataset.
2. Display the first 5 rows.
3. Use info().
4. Use describe().

Task 2 — Data Quality

5. Find missing values.
6. Find duplicate rows.
7. Remove duplicate rows.

Task 3 — Prepare

8. Rename at least **two columns**.
9. Convert one column to the appropriate data type.
10. Create one new column.

Task 4 — Transform

11. Transform one existing column.
12. Make a categorical value consistent.

Task 5 — Combine

13. Load the second dataset.
14. Identify the common key.
15. Merge the datasets.
